

Antec International Limited, Sudbury, Suffolk CO10 2XD, United Kingdom

***Rely<sup>+</sup>On<sup>TM</sup> Virkon<sup>TM</sup> - stability of opened packages***

***500g shaker***

*Based on some recent tests , we would recommend that a 500g shaker is used for a maximum of 1 month after first opening of the foil seal. This requires closing the cap on the package tightly, & continued storage of the package in a cool place (ideally <25C), under dry conditions (<50% RH ) .*

***50g foil laminate sachet***

*These packages are intended only as single use items, & so cannot be retained for later usage. Their design does not allow adequate resealing of the packages, after the first use.*

***5kg drum***

*The 5kg drums may be suitably resealed after use & may be further used in accordance with label instructions up to the labelled expiry date.*

*The powder must be kept dry at all times (any moisture ingress to the package must be avoided during usage), the polybag reclosed & the cap replaced securely on each occasion.*

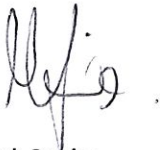

*Continued storage of the packages in a cool place (ideally <25C), & under dry conditions (<50% RH ) is always recommended.*
